Monterey, Va. Friday, May 12, 1911

Good Roads and Tourists.

The subject of the advantages of good roads has been thrashed out very thoroughly and it seems that there is little, if anything, more to be said in regard to them. The *Manufacturer's Record* in a recent issue brings forward a source of revenue that will follow the opening of good roads, that is deserving of attention. This is the influx of tourists that will come into a region when it is made accessible to them, and much good will be produced by having many strangers come to view and land. If the establishment of good, clean hotels with reasonable charges will come about along the hard, well graded highways, a goodly proportion of the tourists who now spend their vacation in foreign lands will spend them at home. The Swiss government has long appreciated the economic value of foreign visitors, and throughout that rugged, mountainous country, well built roads reach every bit of picturesque scenery and many lofty mountain peaks. The winding course of these roads as they climb up precipitous mountains or dip into valleys where some Alpine lake nestles by the foot of a snow clad giant, add no little to the picturesqueness of the scenery, and these roads have almost banished poverty from the land.

Although our mountains do not rival those of Switzerland in height or grandeur, there are a few peaks in the world that surpass the Blue Ridge and Alleghany mountains for tranquil beauty and restful charm. Many years ago Port Crayon described and portrayed the Black-water region, and nothing but its inaccessibility has kept it from being a tourists' paradise. No sooner had Christian Reid's work on "The Land of the Sky" been published than Asheville became a center from which went tourists that have made the unknown sequestered and barely civilized wilds of Western North Carolina the richest, best known and most thoroughly developed portion of the state. Its mines have been developed, its agricultural possibilities have been brought to notice, and along the banks of Swannanoah and the French Broad have arisen exquisite villas and homes of wealthy men. All of this would have been impossible without the network of well graded, substantial roads that cover the "Sapphire Country"; the strong bridges that defy the floods of the mountain torrents, and the cheerful, moderate priced hotels wherein one may take one's comfort in one's inn. Given these same conveniences and Highland, Craig, Grayson and the other back mountainous counties of Virginia would be as popular with the tourist world and the scenery as famous as are Buncomb and Transylvania counties in our neighboring states.

The National Highway from New York to Atlanta now passes through Staunton, and if the counties to the west will only take the trouble and bear the expense of opening themselves to the world, their national attractions would draw visitors who in turn would bear their fame into many lands, and the costs, like the bread thrown on the waters, will return, bringing with it a bountiful increase.—Staunton Dispatch and News.

In the gospel of good roads there is no stronger point to be noted by Highland than that pointed out in the above clipping. While we lay no special claim to originality of thought, our readers will recall previous efforts made by the Recorder to impress this very idea. The real wealth of Highland lays in her summer climate and scenery. It is unsurpassed in the whole union; it has no equal in Virginia.

The day will come when these will be appreciated and in demand. Mark the predictions and hear the Recorder say "I told you so."

The men who prove to be pioneers in removing the barriers that isolate us will be doing the county the greatest service.

A first-class, modern highway between Monterey and Staunton is of more importance, and means more to the county, than any other public improvement or enterprise contemplated. From a progressive, present day view-point it is a necessity.

It is a fact that the Highland Mercantile Co. has the cleanest and most varied line of Dry Goods, such as Gingham, Flaxon, Nainsook, India Linens, Imitation Linens, Pure Linens, Figured Linens and Serges, Mohair, Silks, etc. ever shown in Highland, none to be sold at cost, but at prices to compete with any retail order house in America. No merchant sells goods at cost.

TWO DYNAMITERS STAND INDICTED

Los Angeles, May 5.—The arraignment this afternoon of J. J. McNamara and his brother, J. B. McNamara, each on nineteen indictments charging murder in connection with the Los Angeles Times disaster, was a dramatic affair. The business of the day concluded with a fierce exchange on a part of District Attorney John G. Frederick and the attorney for the prisoners over the matter of bail.

Promptly the counsel for the defense wanted to know whether the court would fix bail in the charge against J. J. McNamara of dynamiting the iron works. Judge Goodell referred the matter to the District Attorney but after extended remarks on the subject, Mr. Frederick said he would wait until Tuesday to say what a reasonable bail would be.

Then the attorney for the prisoners had the prosecution guessing another time apparently when he asked what was going to be done about the original indictment on which the McNamaras were arrested. Let them be arranged on those indictments, he said, or squash them. The district attorney replied that those indictments charging murder on each of the brothers was attended with more nervousness on the part of the district attorney's staff than was shown by McNamara. When the elder McNamara took his seat beside his brother he smiled to him many times and was evidently in the best of humor. The court room was filled with people, when the brothers were led in by the sheriff and attended by a dozen officers. There was no demonstration beyond the business of everyone to get the best look possible. Save for the voices of the lawyers and the judge the court room was at all times perfectly still during the proceedings. No plea was entered today, postponement having been secured in the case until June 1st.

Chamberlain's Stomach and Liver Tablets will clear the sour stomach, sweeten the breath and create a healthy appetite. They promote the flow of gastric juice, thereby inducing good digestion. Sold by Dr. K. H. Trimble.

ANGRY ALASKANSEUMP COAL INTO THE SEA.

Cordova, Alaska, May 5.—The excitement caused by the government's failure to hurry action in Alaska coal land cases reached a climax yesterday when 3300 business men and citizens formed a mob and, armed with shovels marched to the ocean dock of the Alaska Steamship Company where they proceeded to throw several tons of British Columbia coal into the bay.

Incensed at the thought of no reply to appeal cabled to President Taft, to urge early action looking to the opening of the Alaska coal fields the citizens of Cordova decided to follow the example set by the Boston tea party and thus express the serious crisis that has been reached in the Alaska coal situation.

For several days the sentiment in favor of some public outburst has been quietly growing. When yesterday's cable dispatches from Washington failed to bring news of President Taft having acknowledged the receipt of the appeals from Alaska, feeling increased and the call to arms, which in this instance means a call to shovels, was sounded.

The splendid work of Chamberlain's Stomach and Liver Tablets is daily coming to light. No such grand remedy for liver and bowel troubles was ever known before. Thousands bless them for curing constipation, sick headache, biliousness, jaundice and indigestion. Sold by Dr. K. H. Trimble.

NEW BULLETIN ON CURE OF CANCER.

Richmond, Va., May 3, 1911. (Special) Calling attention to the apparently rapid increase of cancer in the country, and urging the importance of early diagnosis and prompt treatment, the State Department has in press a special bulletin on cancer which will be distributed during the week.

Statistics are cited in the bulletin which indicate that cancer is rapidly becoming a serious menace to the country, and it is freely predicted that unless the mortality from this disease is decreased, cancer will ere long claim as many victims as all forms of tuberculosis combined.

The one cheering note is the bulletin is the declaration that, perhaps every cancer, in its early stages, can be cured by prompt treatment.—"Delay," declares the Department editors "can only mean death, prompt and through treatment in the beginning of the trouble, will frequently remove all evidences of the trouble before the cancer develops."

A large edition of this bulletin has been prepared and will be distributed, as are all the bulletins of the Department, free upon request.

A touch of rheumatism, or a twinge of neuralgia, whatever the trouble is, Chamberlain's Liniment drives away the pain at once and the complaint quickly. First application gives relief. Sold by H. Trimble.

NEW RAILROAD TO THE VALLEY.

Richmond, Va., May 2.—A charter was issued here yesterday to Washington city people for a railroad from a point in Virginia opposite the District of Columbia to the city of Winchester, this state, and running through the Virginia counties of Alexandria, Fairfax, Loudoun, Clarke and Frederick. The maximum capital stock of the road is to be \$3,000,000, the minimum \$1,000,000. The principal office is to be at Rosslyn. The name of the road is the Washington and Old Dominion Railway.

TAPS VALLEY OF VIRGINIA

Washington, D. C., May 2.—The granting of a charter by the Virginia state corporation commission at Richmond yesterday to the Washington and Old Dominion Railroad Company in the first step in the construction of a railroad line that will tap the valley of Virginia and bring that section in close communication with this city.

The officers of the new Corporation are Charles M. Hendley, president; W. B. Emmert, vice president; George Howard, treasurer; and Charles E. Howe, secretary; all Washington business men.

The foregoing, with Hugh A. Thrift, George R. Willis and Francis T. Homer, all of Washington, compose the board of directors.

MAKING MAPLE SUGAR.

Cumberland, Md., May 6.—A report of the maple sugar production in Garrett county for the season just closed shows that 30,000 lbs. were manufactured. Elijah Livengood is the largest producer and sets 1,000 Keelers in Maryland. The balance of his 4,000 Keelers are in Pennsylvania. He sets 2,400 Keelers on the east side and 1,600 on the west side of the Casselman river. His largest gathering this year was 408 barrels of water in one day. A barrel of sugar water when boiled down, will yield between five and six pounds of sugar.

Agents Wanted.

J. B. Williams Co., of Cumberland, Md., and Frostburg, Md., one of the largest retail dealers in Monuments, Headstones, etc., desires Agents through Highland County to handle their goods on commission. This is a rare opportunity for school teachers, Merchants, Undertakers, Stone Masons, Cement workers, and Cemetery Superintendents, etc. Only people of responsibility need apply. Address communications to Frostburg, Md.

DEGREE IN JONES CASE

In the decree entered in the case of the commonwealth vs the administrators of J. A. Jones, late treasurer of Highland county, which was a compromise, effected by the common sinner of accounts, John Delaney, there is the following clause which will be of great interest to the many friends of the late treasurer, as well as to the members of his family viz: "And your commissioner further reports that this liability of the said J. A. Jones is due solely and exclusively to mistakes and not to any intentional dereliction of duty."—Staunton Dispatch.

The Thrice-a-Week Edition of the New York World

The great political campaigns are now at hand, and you want the news accurately and promptly. The World long since established a record for impartiality, and anybody can afford its Thrice-a-Week edition, which comes every other day in the week, except Sunday. It will be of particular value to you now. The Thrice-a-Week World also abounds in other strong features: serial stories, humor, market cartoons; in fact, everything that is to be found in a first-class daily.

The Thrice-a-Week World regular subscription price is only \$1.00 per year, and this pays for 156 papers. We offer this unequalled newspaper and the *HIGHLAND RECORDER* together for one year for \$1.70.

The regular subscription price of the two papers is \$2.00

Often The Kidneys Are Weakened by Over-Work.

Unhealthy Kidneys Make Impure Blood.

Weak and unhealthy kidneys are responsible for much sickness and suffering, therefore, if kidney trouble is permitted to continue, serious results are most likely to follow. Your other organs may need attention, but your kidneys must, because they do most and should have attention first. Therefore, when your kidneys are weak or out of order, you can understand how quickly your entire body is affected and how every organ seems to fail to do its duty.

If you are sick or "feel badly," begin taking the great kidney remedy, Dr. Kilmer's Swamp-Root. A trial will convince you of its great merit.

The mild and immediate effect of Swamp-Root, the great kidney and bladder remedy, is soon realized. It stands the highest because its remarkable health restoring properties have been proven in thousands of the most distressing cases. If you need a medicine you should have the best.

Sold by druggists in fifty-cent and one-dollar bottles. You may have a sample bottle by mail free, also a pamphlet telling you how to find out if you have kidney or bladder trouble. Mention this paper when writing to Dr. Kilmer & Co., Binghamton, N. Y. Don't make any mistake, but remember the name, Swamp-Root, and don't let anybody tell you something in place of Swamp-Root—if you do you will be disappointed.

WINTER POULTRY ILLS.

Methods of Treatment Recommended For Catarrh and Liver Congestion.

One of the commonest of the winter diseases of poultry is catarrh. Cold, some people call it; others speak of it as roup. It is not this last, although so close is the resemblance at times that one could easily be misled. Any way, catarrh is serious enough. It is catching also. Among birds roosting with heads pressed closely together the sick ones are sure to give it to healthy fowls. It seems to follow along the line of pure breeds. This may be due to the fact that the penned breeding stock from which eggs and broilers have been bought has been housed too warmly and pampered and that somehow a predisposition to take on catarrh follows down through the generations.

You will first notice it by a peculiar shake of the head, next a running at the nostrils and sometimes gurgling in the throat. If you cannot master this phase of the disease in young fowls in a few days, better kill them. The snuffy nosed should be separated from the well housed by themselves, fed heavily on rich foods, with arsenite of antimony or guanine in drinking water and mash. The head should occasionally be dipped in kerosene—half water, half kerosene. Two applications have been known to stop the nostril discharge. Get arsenite tablets one thousandth of a grain in strength and place twelve of these in one pint of water. If you give guanine give two grains to the fowl per day. This disease is decidedly dangerous among the young fowls, so many die with inflammation of the lungs, which seems to follow the catarrh.

The above disease is likely to take hold of the young in the cool days of fall, extending to the older fowls in winter. There is one winter disease of fowls a year old or over that is seldom known among the young—liver congestion. It is probably due to a rich ration, like corn and lack of sufficient grit. If one feeds sufficient bran with corn, as bran is a laxative, the danger may be averted, though the grit be missing.

Quite often one will not guess this trouble until the older, fatter hens begin dying. The remedy is varied food, grit and exercise.—Farm and Fireside.

MINERS, NOT FARMERS.

A society for prevention of cruelty to the soil should be formed to prevent farmers who do not read the agricultural papers from mining the potash and phosphoric acid and selling them without proper return to the land of their equivalent.

Twofold Value of Shade Trees.

The landowner who plants no shade trees deprives himself of two sources of lifelong enjoyment. First, he misses the beauty which the growing tree imparts of his surroundings and the comfort its shade may afford the dwellers in his farmstead, both human and four footed; second, he loses the exaltation of feeling that ever comes from the exercise of the altruism which plans for coming generations regardless of oneself.—Kansas Farmer.

Grafting Wax.

A good recipe for grafting wax is to take four pounds rosin, two pounds beeswax and one pound tallow. Set them on the stove in a pan or something of that character to aid in dissolving, and when they have reached the liquid state pour into a pail of cold water. This will make a thick mass like molasses candy, and it can be pulled and made into rolls as desired.—New England Homestead.

Working Soils When Wet.

Soils should not be worked when they are wet. This is especially true of those which do not have much organic matter. Clay soil makes a good brick because it is free from organic matter. Working some soils when they are too wet and allowing them to bake in the sun really makes brick of the parts turned up, and those parts will be about as productive as bricks would be.—Farm Progress.

Live Stock Notes.

When you use a grade or scrub sire you are breeding for the worst there is in him. There is no quicker way to run down a herd of domestic animals than to use a low grade herd breeder.

Azorita comes from overfeeding idle horses. Save feed and horses, too, by reducing the ration when they are not working.

If your sheep get scabs better clean them all out and begin over. It is the best way to cure disease.

Speltz makes very good food feed when ground, and some folks soak it for feeding. It has nearly the same feeding value as wheat.

Growing colts should always have a smooth, roomy lot in which to exercise and should be given the run of this inclosure summer and winter.

Alfalfa pasture and skim milk make an excellent combination for growing pigs. A pound of corn per day for a hog weighing 100 pounds will be sufficient to make a rapid and profitable growth.

It is a serious mistake to buy a ram just because he is well bred and good looking. He must have individual merit.

The man who compels his horse to pull the plow day after day with an ill fitting collar should be compelled to pitch bundles to a thrashing machine with a fork with a bur oak sapling for a handle until he gets his brain into working order.

Just arrived at C.W. Trimble's, a splendid line of mens and boys straw hats, ladies and misses and childrens Sailors and Ladies and Misses trimmed hats.

Prompt relief in all cases of throat and lung trouble if you use Chamberlain's Cough Remedy. Pleasant to take, soothing and healing in effect. Sold by Dr. K. H. Trimble

You will get relief from Pain when Dr. Miles' Anti-Pain Pills are taken.

KILLING WITCH GRASS.

Two Ways of Fighting the Pasture Weed Described—One is Unusual.

One spring witch grass began to show in a clover pasture. It was a wet season, and we couldn't keep it down, says a Wisconsin correspondent of the American Cultivator. The next season I put some ground iron cabbage, just a little cabbage along where this quack was, and there is one of the crops that will help to clean the land by the amount of thorough cultivation of the ground. I hoed it out all summer long, clear up to the 1st of September, and last season I put a strip of corn again on this same ground in order to kill the quack out if there was any left, but I failed to find any there at all, and it was cleaned out just by working it thoroughly with the cabbage crop the year previous.

A somewhat unusual method of fighting witch grass was described in a Wisconsin farmers' meeting. The infested land was heavily manured in the winter or spring and the manure harrowed two or three times to work it down among the roots and stimulate rapid growth, which brings the roots nearer the surface. When the grass begins to bloom is reckoned as the weakest stage, when it is most easily destroyed. It is then plowed under, using a chain to turn under the tops and then carefully bury all the grass. The field is then harrowed and disk harrowed, the harrow being set over so as to slightly loosen the upper soil. Then buckwheat is harrowed in, two bushels per acre.

It was found that the buckwheat will keep down all the witch grass surviving, and the little that is left will be killed if the field is plowed and left in the furrow over winter. No attempt is made to harvest the buckwheat, but the improvement of the soil in the destruction of the witch grass is considered sufficient repayment for the use of the land one year. Those who would be unwilling to give up their land entirely for a season could plant a good crop even after the witch grass had bloomed and was turned under. No doubt a good crop would more thoroughly kill out the grass than any other means and would afford some direct return for the labor.

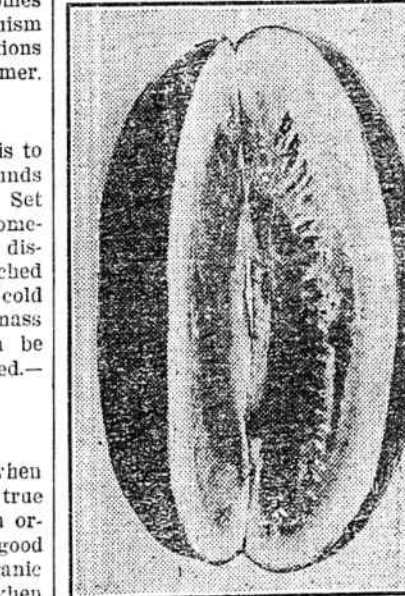

The greatest need of American farms is not more land, but more thought. The land needs thought and of the best, but who shall give it if not the owner?

GROWING WATERMELONS.

Directions For Cultivation of This Luscious, Big Bodied Fruit.

Watermelons are not as extensively grown in the north as muskmelons. This is one of the few fruits that have no valuable byproducts, as its juice cannot be converted into vinegar, nor can it, like the cantaloupe, be distilled into brandy.

The seed may be sown directly into the hills. About twenty seeds should be pushed down, pointed end first, in each hill. This sounds like lots of

A GOOD SPECIMEN.

work, but it is quickly done. In the north it is customary to sow the seed in boxes and transplant to the field. It is well to use some quickly available fertilizer so that young plants can get an early start. The hills should be about ten feet apart each way, but some of the smaller varieties may be planted as close as 6 by 8.

The watermelon is so easily grown that every home garden may raise a supply. There is a firm fleshed variety known as the citron melon which is valuable for preserving.

Commissioner's Sale of Valuable Land.

By virtue of authority vested in me by a decree of the Circuit Court of Highland county entered on the 20th day of April, 1911 in the chancery cause there in pending of John M. Jones, guardian etc vs. Maggie Fleisher etc, I will as special commissioner on

SATURDAY, JUNE 10, 1911,

offer for sale by way of public auction to the highest bidder at the front door of the court house of Highland county: First, that certain tract of land known as the C. T. Fleisher land lying near Vanderpool containing 250 acres, more or less, of which Joseph W. Blagg, died seized. This is an excellent farm, well watered with a good dwelling house and out buildings thereon and in fine situation of cultivation and is a desirable home.

Second: A one half undivided interest in two tracts adjoining one another containing in the aggregate 897 acres, more or less, of which said Joseph W. Blagg died, seized, lying on Jack Mountain All the land which was conveyed to said Joseph W. Blagg by Joseph M. Siron a wife will be sold. This is a nice piece of Mountain land with some good timber on it and is especially adapted to range-keeping.

Terms: Enough cash on day of sale to defray the costs of suit and sale and for the balance the purchaser to execute three bonds falling due at one, two and three years respectively from date dated on the day of sale, bearing interest from date, valuing the homestead and with security to be approved by the commissioner.

J. W. H. Matheny, Clerk of the Circuit Court of Highland County, hereby certify that the bond required by the above decree has been executed by the commissioner.

W. H. Matheny, clerk. Andrew L. Jones, comr.

For 1-1-11 Dr. Miles' Anti-Pain Pills.

The Fountain Head of Life Is The Stomach

A man who has a weak and impaired stomach and who does not properly digest his food will soon find that his blood has become weak and impoverished, and that his whole body is improperly and insufficiently nourished.

DR. PIERCE'S GOLDEN MEDICAL DISCOVERY makes the stomach strong, promotes the flow of digestive juices, restores the lost appetite, makes assimilation perfect, invigorates the liver and purifies and enriches the blood. It is the great blood-maker, flesh-builder and restorative nerve tonic. It makes men strong in body, active in mind and cool in judgment.

This "Discovery" is a pure, glyceric extract of American medical roots, absolutely free from alcohol and all injurious, habit-forming drugs. All its ingredients are printed on its wrappers. It has no relationship with secret nostrums. Its every ingredient is endorsed by the leaders in all the schools of medicine. Don't accept a secret nostrum as a substitute for this time-proven remedy of known composition. Ask your neighbors. They must know of many cures made by it during past 40 years, right in your own neighborhood. World's Dispensary Medical Association, Dr. R. V. Pierce, Pres., Buffalo, N. Y.

EXCLUSIVE FOOT-WEAR

Don't be satisfied with a shoe that simply looks well on the foot, when you can get Style, Comfort and Durability all in one. We are now showing one of the most exclusive lines of foot-wear that we have ever put before the public. Be convinced of what we say by buying your fall shoes from us.

We can give you a shoe in all the different leathers—Velvet, Suede, Suede with Cloth Tops, Gun Metal with Cloth Tops, Patent Leather with Cloth Tops, Cravanett and all the more staple varieties at prices to suit the purchaser.

There was a girl name Mandy, She always looked quite fine and dandy; Her hair was brown, and her eyes were blue, And she always wore the J. & K. Shoe.

ARMSTRONG SHOE CO., Staunton, Va.

WINCHESTER

Repeating Shotguns

USED IN THE U. S. ARMY.

The U. S. Army authorities know a gun; that is why, when they decided to equip some troops with repeating shotguns, they selected the Winchester in preference to all other makes. The experts of the U. S. Ordnance Board also know a gun; that's why, after submitting a Winchester Repeating Shotgun to all sorts of tests, they pronounced it safe, sure, strong and simple. If you want a shotgun—buy the one whose strength and reliability led the U. S. Army authorities to select it and the U. S. Ordnance Board to endorse it—that's the Winchester.

THE RELIABLE REPEATERS

Announcement

To the voters of Bath, Highland and Rockbridge Counties and the city of Buena Vista.

I take this means of announcing that I am a candidate for re-election to the House of Delegates of Va., for the district composed of Bath, Highland and Rockbridge Counties and the City of Buena Vista. Subject to the Democratic Primary.

John W. Stephenson, Warm Springs, Bath Co. Va.

To the Voters of Highland Co.

I hereby announce myself a candidate for the office of commissioner of Revenue. I pledge myself if elected to faithfully discharge the duties of the office to the best of my ability.

Respectfully, J. H. Pruitt.

NOTICE TO TAX PAYERS.

All persons in arrears with Taxes and Levies for the year 1910 are requested to make settlement not later than June 1st, after that date I shall have to place the tickets in the hands of an officer for immediate Collection, and it is not my desire to add cost on any one.

Willis Gibson, Treasurer.

Private Sale of Farm.

Located one and a quarter miles East of Crabbottom mills, containing 325 acres, 225 acres well improved, and balance in first class timber.

Two good never failing spring on the place, also lies along the South Branch River. This place has a very good dwelling and other out buildings, two fine orchards of improved fruit, cuts about 15 stacks of hay now and could be made to cut more, last year it grazed 100 head of stock. The whole farm is well fenced.

W. M. Arbogast, Crabbottom.

Livery and Feed Stable.

I have opened a feed and livery stable in Monterey. Good attention and reasonable price will be my motto to all customers. Let us serve you. I will also run a hack each week to Bartow or Staunton. Rates reasonable.

W. M. Wimer, Monterey, Va.

Cleaning and Pressing

I am prepared to clean and press your clothes—any kind of goods—on short notice. Old goods remade to look like new. Satisfaction is guaranteed or money refunded. Send in your clothing.

W. F. Simmons, Monterey, Va.

For 1-1-11 Dr. Miles' Anti-Pain Pills.

Hortenfie 77909 (64437)

is a pure bred Imported Percheron Stallion. He will make the season of 1911 in Monterey and Blue Grass districts, dates and places will be posted up in a few days.

Hortenfie is a beautiful black horse, weighs 2000 pound, has fine action, kind disposition, splendid conformation, and is of strong and healthy ancestors.

Sire, Valory (58112), by Chicano 43907 (43398), by Jules (37957), by Fillers 13169 (5881), etc.

Dam, Farvette (35168), by Picador II (5566), by Picador I (7330), by Bayard (949), etc.

Terms—A fee of \$15.00 to insure a colt to stand and suck. Parting with mare forfeits insurance. Care will not be taken to prevent accidents, but will not be responsible for any that might occur. Blue Grass Percheron Horse Co., Ira Gutsall, keeper

Samuel No. 3339

This elegant German coach Stallion will stand the season of 1911 at the barn of J. A. Hiner, Doe Hill, Va. All prospective breeders should see this champion horse before breeding. Samuel took the blue ribbon at the Highland Show held in 1910 over all competitors. His colts took more blue ribbons than the colts of all his competitors combined.

Pedigree—Samuel No. 3339 is registered in both the German and American coach horse associations.

Sire, Domherr 1338, by Immo 1303, by John v. Ardo 1000, by Agamemnon 560 etc.

Dam, Sabelle 9516, by Einar 1694, by Young Othello 931, by Othello 955 etc.

Terms—a fee of \$15 will be charged to insure a mare in foal. Parting with mare forfeits the insurance. The greatest care will be taken to prevent accidents but will not be responsible for any that may occur. Parties wishing to send mares to be bred can do so as they will be well kept and properly attended to. For any further information write or phone a Hiner or J. O. Armstrong, Doe Hill, Va.

Have You Seen Him

A. I. SOLOMON,
